**CATALOGUE 2022 - 2023**

## Asteras CF 4x4 & 4x4 all carbon

NOW 24V MOTOR 400W

Zero damage,  
Maximum performance

New Technology **4x4**

 **Type of movement**  
Pulse motion with vibration  
Technology 4x4

 **Initial length**  
2,50m – 3,00m

 **Type of head**  
32 conical carbon fiber sticks

 **Rpm of the head**  
2000 rpm @ 16V DC

 **Motor**  
14 - 16V / 400W  
28 - 30V / 400W \*concerns 24V motors

 **Output**  
200 – 250kg olive seed

 **Construction material**  
Carbon Fiber Tube

 **Average consumption**  
8A / hour

 **Weight**  
3,05kg / 2,90kg

 **Cable length**  
15m

 **Power supply**  
Generator or battery  
(80A – 100A) with converter

**NEW TECHNOLOGY**

## Amolivo, Amolivo All Carbon & Amolivo Telescopic

The new generation of  
machines is here

 **Type of movement**  
Pulse motion with vibration

 **Initial length**  
2,30m  
(up to 3.3m with extension)

 **Type of head**  
2 cams, 2 rods steely gears,  
8 carbon fiber sticks

 **Rpm of the head**  
700-1550rpm @ 12V DC

 **Motor**  
12V / 800 W (Brushless)

 **Output**  
200 – 270kg olive seed

 **Construction material**  
Aluminum Tube /  
Carbon Fiber Tube

 **Average consumption**  
6A / hour

 **Weight**  
2,0kg (without cable) /  
2,5kg (without cable)

 **Cable length**  
15m

 **Power supply**  
Battery (80A – 100A)  
or generator (with company's voltage stabilizer)

**NEW PRODUCT**

## Asteras Electric with Brushless motor

The new generation of  
machines is here

New Technology **4x4**

 **Type of movement**  
Pulse motion with vibration  
Technology 4x4

 **Initial length**  
2,50m – 3,00m

 **Type of head**  
T8 aluminum counterweights  
with 32 carbon fiber sticks

 **Rpm of the head**  
2850 rpm @ 12V DC

 **Motor**  
12V / 1000 W (Brushless)

 **Output**  
200 – 250kg olive seed

 **Construction material**  
Carbon Fiber Tube

 **Average consumption**  
8A / hour

 **Weight**  
2,6kg (without cable)

 **Cable length**  
15m

 **Power supply**  
Battery (80A – 100A)

**NEW PRODUCT**

## Asteras CF & all carbon

NOW 24V MOTOR 400W

Flexible and durable,  
move freely inside the dense branches

**Type of movement**  
Pulse motion with vibration

**Initial length**  
2,50m – 3,00m

**Type of head**  
32 conical carbon fiber sticks

**Rpm of the head**  
2000 rpm @ 16V DC

**Motor**  
14 - 16V / 400W  
28 - 30V / 400W \*concerns 24V motors

**Output**  
200 – 250kg olive seed

**Construction material**  
Aluminum Tube /  
Carbon Fiber Tube

**Average consumption**  
8A / hour

**Weight**  
3,05kg / 2,85kg

**Cable length**  
15m

**Power supply**  
Generator or battery  
(80A – 100A) with converter

**BEST SELLER**

## Asteras Max 6x6

NOW 24V MOTOR 400W

Maximum range,  
Absolute performance

New Technology **6x6**

**Type of movement**  
Pulse motion with vibration  
Technology 6x6

**Initial length**  
2,50m – 3,00m

**Type of head**  
T8 aluminum counterweights  
with 48 carbon fiber sticks

**Rpm of the head**  
2000 rpm @ 16V DC

**Motor**  
14 - 16V / 400W  
28 - 30V / 400W \*concerns 24V motors

**Output**  
200 – 250kg olive seed

**Construction material**  
Carbon Fiber Tube

**Average consumption**  
8A / hour

**Weight**  
2,95kg

**Cable length**  
15m

**Power supply**  
Generator or battery  
(80A – 100A) with converter

**NEW PRODUCT**

## Angelis 1 (Koupepe)

The machine that made  
the olive harvesting  
easier than ever

## Complimentary Products

### Generator cart 12V with dynamo

- Available with 12 – 30V speed regulator or 13.8V voltage stabilizer
- With a central setting for three olive harvesters of the same type
- The dynamo is 70A and is placed on an anti-vibrating base.
- Accepts threaded engines
- All equipped with metal borns

### Transformers

Transformers for 1 or 2 sticks  
Converts AC220V – DC12V  
The 1 position transformer has a 20A coil, automatic relay and switch for 4 DC settings from 12 – 18V  
The 2-position transformer has 2 20A coils each, 2 automatic relays and 2 switches for 4 DC settings from 12 – 18V  
They also charge the car battery separately

### Voltage Stabilizer 13.8V / Converter – DC Battery Regulator 12 – 19V

Recommended 80 – 100A battery for 6-7 hours of continuous operation of the olive harvester  
There is polarity in the joint with the battery (+ –)

### Microgenerator

- Available with 12 – 30V speed regulator or 13.8V voltage stabilizer
- With a central setting for 1 to 2 olive harvesters of the same type. (suitable for amateur olive growers)
- It has a Lianlong 2.5 hp petrol engine
- The dynamo is 70A and is placed on an anti-vibrating base and has a compler on its axis.
- Weight 18,5kg
